SUMMARY

Business Analyst with 4+ years bridging business, data, and technology teams, including 3+ years in regulated environments where governance, traceability, and audit-readiness are built into every delivery. Translates business needs into requirements, user stories, acceptance criteria, and functional specs, then validates delivered solutions through data checks, UAT, and defect tracking. Strong in data mapping, validation, and reporting with SQL, Power BI, and Excel, plus working knowledge of customer data platforms, data privacy, and data quality controls.

WORK EXPERIENCE

AI Evaluator

Mercor - Remote
May 2026 - Present

- Evaluate and score AI model outputs on business and data tasks against defined rubrics, checking accuracy, reasoning, and instruction adherence.
- Test prompt variations and document failure patterns to tighten quality benchmarks and improve reliability.

Product Owner / Business Analyst

BodyWellnessAI - Toronto, ON
July 2025 - April 2026

- Owned requirements and functional specifications for a consumer data platform covering 50+ conditions, including user personas and end-to-end journey maps that drove personalization and segmentation logic.
- Translated business needs into user stories, acceptance criteria, process flows, and business rules; managed and prioritized the backlog across multiple release cycles.
- Defined and validated audience and segmentation logic using customer, behavioral, and engagement data to support audience creation, testing, and activation to downstream experiences.
- Validated outputs with data checks and root-cause analysis, tracking issues to resolution and improving segmentation accuracy and customer engagement over time.

Business Analyst, IT Consulting

Sarjen Systems Pvt. Ltd. - India
January 2022 - June 2025

- Gathered, analyzed, and prioritized business, functional, data, and technical requirements, facilitating stakeholder discussions to define use cases, KPIs, and success criteria.
- Partnered with data architects and engineers to document data sources, schemas, mappings, integration points, APIs, and business rules across regulated deliveries.
- Performed source-to-target data validation to ensure accuracy, completeness, and consistency, checking ingestion, transformation logic, and field-level mappings against requirements.
- Built 8 Power BI dashboards using SQL and data extracts, giving leadership a real-time view of delivery and performance and supporting reconciliation and business sign-off.
- Led UAT end to end (test case development, execution, defect tracking) plus production validation, supporting defect-free go-lives across 7+ deployments.
- Documented data governance artifacts (quality controls, privacy, consent, lineage, data flows) in Jira and Confluence; delivered training and process improvements that increased efficiency by 20%.

EDUCATION

B.Eng, Information Technology

Gujarat Technological University
2018 - 2022

CERTIFICATIONS & AWARDS

Certifications

- Business Analysis & Process Management (Coursera).
- Intro to SQL (University of Michigan / Coursera).
- Agile Project Management (HP LIFE).

- AI Fluency: Framework and Foundations (Anthropic Academy).

Awards

Sarjen Systems

- Employee of the Month.

SKILLS

Requirements Gathering, Prioritization & Validation, User Stories & Acceptance Criteria, Process Flows & Business Rules, Functional Specs, Stakeholder Facilitation, Use Case & KPI Definition, Data Mapping & Schema Docs, Source-to-Target Validation, Data Quality Controls, Reconciliation & Root-Cause Analysis, Data Privacy, Consent & Compliance, Data Lineage, Audience & Segmentation Logic, UAT, Integration & A/B Testing, Test Cases & Defect Tracking, Measurement Frameworks, Continuous Optimization, SQL, Power BI, Excel, Jira, Confluence, Customer Data Platforms (CDP) & MarTech concepts
